THE UNINHIBITED ENERGY  OF CREATIVITY
Passion flows throughout the Q50, weaving your emotions with every dynamic body line. From the Q50 SENSORY model to the top of the line, creativity is expressed in an angular and sportier front fascia complemented by an aerodynamically clean rear lower diffuser, Gloss black accents and exclusive red calipers expand the palette on RED SPORT 400. Or for unique distinction, opt for the SIGNATURE EDITION and its stylish strokes of dark chrome.

SEVEN WAYS TO GET THRILLING PERFORMANCE
Feel exhilarated from the start. Pick the twin-turbocharged engine that suits you best: a 3.0-liter V6 with 300-hp or a 400-hp engine that features electronically variable valve timing technology for maximum power. To carve a turn your way, the Q50 gives you two ways to steer: Rack Electronic Power Steering offers a traditional feel with Sport Mode to sharpen response, while Direct Adaptive Steering**, available on the ProACTIVE Package, digitally processes your inputs so steering feels faster and smoother. The choice of suspension is equally empowering. Standard Suspension is equally empowering. Standard Suspension offers a double wishbone front and independent multi-link rear suspension for a smooth, confident ride. Or opt for Dynamic Digital Suspension** that features electronically adjustable dampers and advanced hardware to deliver a custom handling experience. Your experience can be further refined with the INFINITI Drive Mode Selector for response that can be personalized to your liking.

CREATED FOR THOSE WHOSE LIVES ARE ALWAYS ACCELERATING, THE Q50 IS A H-Tech sport sedan that helps you pursue the path that challenges, and thrills. When that path demands greater performance and agility, you’ll change wheels with a choice of a 270-hp or 400-hp twin-turbocharged V6 engine and handling systems you can dial in to your preference. When the road brings the unexpected, you’ll travel with the confidence of INFINITI drive assist technologies that can expand your awareness and help respond if danger is detected around you. When your personal journey extends your time behind the wheel, you’ll be optimally positioned in an interior that automatically recalls the driver’s preferred settings, while premium materials take personal refinement even further. This is luxury for a life lived in Drive.

LUXURY SHOULD BE LIVED IN

Shaped by Individuality

No two drivers are alike. A Q50 gets to know – and remember – each driver in detail. Opt for the memory system, and each driver’s Intelligent Key automatically personalizes your cockpit as you enter. Beyond the seat, steering wheel and side mirrors taking your positions, even your temperature and audio preferences for over 200 stored settings are recalled before you ever sit down. To match personalization with performance, the RED SPORT 400 brings genuine Matte Black Carbon Fiber and red contrast stitching that accentuates the cabin with attitude.

De-Stress from highway driving

With drive assist technologies, INFINITI can help ease the demands of the daily commute. Available Intelligent Cruise Control can automatically maintain your speed and distance to the car ahead, can brake when traffic slows, and accelerate when it clears. Active Lane Control on the ProACTIVE Package helps keep you centered in your lane even on uneven roads for less stress. Beyond responding to the road in front of you, also included is a Blind Spot Intervention that uses sensors to help detect cars in your blind spot area and can intervene to help avoid a collision.

Tech that helps look out for you

No matter which trim level you choose, your Q50 will include INFINITI world first technology that continues to lead the way today. Such as Predictive Forward Collision Warning that can alert you to a potential collision two cars ahead – a feature that comes standard. Just one level up, on the LUXE model, the suite of visionary tech expands for added confidence, including Backup Collision Intervention that can help you brake if rear cross traffic is detected Or Around View Monitor with Moving Object Detection, which can assist you in parking and tight maneuvering with a virtual composite 360° view from above.
